Geneva plays important negotiating stage in East-West detente

THE GERMAN TRIBUNE

Frantfiertet Allgemeine mirino ett proviestano

eneva has of late merited more attention as an additional scene of Bonn's policy of relaxing tension with the East alongside Berlin, Warsaw, Moscow, Erfurt and Kassel.

The headquarters of numerous international organisations and sub-divisions of the UN. Geneva exercises an influence on multilateral politics that should not be underestimated in continuation of what governments attempt to initiate in bilateral talks.

What is more, developments in bilateral relations can to a certain extent be influenced or prejudiced by the Geneva

Bonn is represented in Geneva by Ambassador Swidbert Schnippenkötter, who used to be this country's disama-ment delegate, and a staff of for the most part young and alert officials.

For some time the Federal government seems to have been intent on utilising the opportunities Geneva provides as a proving ground for a more flexible policy towards the Eastern Bloc and on the German Question.

East Berlin's man Dr Siegfried Zachmann, a semi-diplomatic status "observer" who enjoys massive support from the Eastern Blue delegations, is for that matter also bringing pressure to bear in his government has long desired.

This country's first attempt to grasp the detente initiative in Geneva rather than in conjunction with the Western Allies to styrnie in response to Eastern Bloc moves as in the past has, sad to say,

construction.

another.

1945 were utoplans.

It was at the beginning of April and the problem was that of GDR attendance at rangements with other UN bodies. this year's general assembly of the UN Economic Commission for Europe. In weeks of behind-the-scenes talks Schnippenkötter tried to reach agreement between East and West on what was described as an informal, pragmatic solution. The legal aspect of the problem, particularly the matter of the delegation's

atus, was to remain unaffected. Until 1958 the East Berlin delegation attended talks as adviser to the Soviet occupation forces, subsequently preferring not to take part because it felt discriminated against in view of the full membership accorded to the Federal Republic. It was now quietly to resume attendance as the official GDR delegation

but without voting rights. This suggestion reportedly met with the approval of both the Western powers and Soviet Union but East Berlin is claimed to have insisted on all or nothing, in which it was backed by a number of Eastern Bloc delegations, particularly the

For their part the three Western powers are supposed to have made it clear at Geneva that they intend to uphold their responsibility for Gennany as a whole and that as regards the legal status of the GDR and the ECE they went by Article 10 of the EEC statute, which refers to East Berlin's occupation zone status.

At all events the projected ECE arrangement did not materialise. This may partly have been due to the fact that it Geneva with the aim of achieving the was already known that the Federal to oppose the GDR's application for full membership of the World Health Organi-

> Bonn will hoar nothing of this attitude necessarily appearing contradictory. Re-centry of GDR representatives into the ECE would not have involved a

It would thus not have represented a break with Bonn's tenet that any status improvement of the GDR by way of admission to UN bodies ought to be dependent on tangible results of the intra-German dialogue.

The target of intra-German detente would. Bonn argued in canvassing votes against GDR membership of the Willo, be jeopardised were East Berlin without counter-concession allowed on the basis of the Vienna formula to become a member of other UN bodies.

West German diplomats in Geneva privately maintain that this policy line which it is their job to advocate would have proved virtually untenable in the WHO if the GDR had been admitted to the ECE under the designation "German Democratic Republic" and so in the eyes of the Third World appeared to have achieved a breakthrough.

Viewed from Geneva a fair number of factors would seem to be involved in deciding how long this breakthrough can be forestalled and what other inter-

national organisations would follow suit. Whether East Berlin concedes the intra-German improvements Bonn demands or Bonn one day has to submit to the view voiced in Geneva by the Poles in particular that there can be no concessions in return for the recognition of realities will not, in the final analysis, clinch the issue.

The direct, immediate political and tions on the basis of which individual dolegations, particularly those of nonaligned and neutral countries, decide for or against GDR membership of one international organisation or the other are bound to prevail over the arguments of the two principal protagonists.

The degree of dependence, reliand or relationship with one or other of great powers will play an important; So will the prospect of more developaid or trade policy concessions.

One factor is of more importance though. It has become increase apparent over recent months that limits of the political and diplacticeway allowed Bonn and East Ref. both in Geneva and in respect of relati with the United Nations and and organisations - are to be found at point where the Allies of the \$2 World War feel their own rights. interests to be affected.

As far as they and many o countries are concerned GDR men ship of UN organisations is not mezi matter of an extra vote for the Es Bloc or of the principle of unit representation being followed.

Even Eastern Blue countries in to have been known unofficially to. anxiety lest the GDR, economically politically powerful as it undoubted manoeuvre itself into too imparte position once it gains admission to rganisations.

Political partnership within EEC must be the long-term aim

Bounds to the imagination were set by There was a far more political note to the establishment of the ECSC than there hardship and hopes were interned in zones of occupation. People who thought was to that of the Common Market. The in terms of European integration in May political intentions behind coal and steel No one would have dared to predict policy were, of course, fairly obvious. that there would soon be a Council of One of them, for instance, was to prevent Germany from building up an arms in-Europe, still less that a treaty would shortly be signed that was to clinch the dustry again.

resolve no longer to wage war against one At the same time, though, this country assumed political partnership in the gay beginnings of an integrated Europe.

Yet on 9 May 1960 French Foreign Minister Robert Schuman proposed the In the case of the EEC political amsetting-up of a European Coal and Steel bitions were classed as longer-term targets community, conceived of, as it were, as setting-up of a European Coal and Steel cooperation between Krupp's (who had my. Europe's lost verve was gradually to be reactivated.

In the ten years of the history of the Common Market this longer-term target neveramention. The EEC Parliament will be slept a deep sleep but was never completely recalling it today and elsewhere com-memoration celebrations were held on forgotten. The Six finally expressly remembered it at The Hague summit.

Nothing the BEC undertakes is non-political, mind you. Indirectly the en-It is gratifying to note that France has applauded Robert Schuman again, The largement of the Common Market to anniversary celebrations prove that his include Britain, Ireland and Scandinavian idea lives on. The ECSC may originally countries is a political act. have been a brainwaye of Jean Monnet

Work on the entry bids has made so much progress of late that the four level of a political possibility.

As the European Common Market applicants are officially to be invited to Luxembourg for entry negotiations on 30 developed from the ECSC the com-

memoration leads directly to the present ...This may be no more than the implementation of a decision or the keeping

of a promise but it can nonetheless be rated as a success. Difficulties enough had to be overcome before full talks were

They are to start in style but will soon have to get down the business. Satisfactory entry conditions must be negotiated for a Britain embedded in its monwealth and on the brink of a general election.

In addition to a policy of completion and expansion the EEC has also undertaken to get down to foreign policy - the real thing. It now looks as though expansion and foreign policy are clashing. Foreign Ministers compile documents on closer foreign policy cooperation but the

Whitehall would like to participate in this preliminary work but France objects is only in favour of a close political framework in order to ensure that mem ber-countries do not pursue policies that are completely at odds with one another.

As a result the Six will presumably remain on their own and doubtless only half-heartedly at that.

Is the Western European Union a way out of the problem? France intends to resume full and active membership of the WEU shortly and Britain is a member. France will no longer oppose political talks at WEU meetings but on the other hand debate does not lead to binding decisions and will not be so unless fundamental changes are made to the WEU's functions.

Maxim Fackler (Süddeutsche Zeitung, 13 May 1970)

POLITICS

All is far from quiet on the SPD front

the Social Democratic Party, is visibly disquieted. He has noticed that things could be going awry. He even stood at the speaker's desk and read a petition from thirty one delegates from six various regions on Vietnam and Cambodia. Obviously the Young Socialists are

Willy Brandt, wearing a blue suit and with his usual suntan, tried to give reas-

The petition that had suddenly been dropped on the speaker's desk stated: The defence of democracy and freedom has been used as a pretext for fighting a brutal imperialist war in South-East Asia designed to stamp out great sections of the populace and back up American vested interests."

SPD youth speaks out

Anxiety lest this prove to be Young Socialists in opposition to the consequence of detente between the Social Democratic establishment pubparts of Germany and the East and lished a "pragmatic paper" as a satirical West in general is voiced in part by jibe at the progress of the party con-who in the past accused Bonn of put ference in Saarbrücken.

> "Conference," the draft emphatically demands that all be done that needs to be done. Far too little was done in the past. There could be grave consequences if more is not done.

"Conference emphatically condemns the party executive's failure in the past to do everything that could have been done.

"The executive then counters with the Geneva, where despite po following motion: Conference calls on differences between the various & the party executive to do everything to tions from East and West the atmost ensure all is done that needs to be done. of work in progress is extremely! All other motions are thus covered."" (Münchner Merkur, 13 May 1970)

> The petition goes on to talk of increased Fascism in American society. No wonder Willy Brandt looked concerned. If such a motion were passed at the

meeting his foreign policy and that of his coalition partner Walter Scheel whose name was mentioned repeatedly by prominent SPD members at this conference, would be compromised. The petition was presented by Karsten Voigt, chairman of the Young Socialists,

who was not originally to be a delegate at this conference but stepped in due to the indisposition of a delegate from his

In comparison to the vehemence of this resolution the committee's motion which in accordance with the Socialist International deplores the American march into Cambodia, is tame. The speakers who followed Voigt were

as unbending as he himself in this question and in the matter of Greece. They are calling for Greece's membership of Nato to be suspended and for a cessation of weapon supplies to Greece.

The Party committee called on Ministers Horst Ehmke and Helmut Schmidt and then on Chancellor Brandt himself with all his prestige.

He said: "The war in South-East Asia should not cause a split in the Party at All articles which THE GERMAN 110 this conference."

reprints are published in cooperation of the radical perfect of the conference of the

The radical petition was finally defeated. With slight modifications the

as well as bark a few hours earlier. With a complicated debate on Party organisational business they had caused a digression of over an hour at the Party con-

On most points they suffered defeat in the end. But two points made by them got through: For the duration of this conference all boards were to sit before the public and modifications were to be made to the "block system" for elections to the committee, which has often been otly attacked.

This is one of the paradoxes of this Party conference which was anything but a victory celebration for the SPD after the government changeover in Bonn.

On one side there was the Party Establishment giving its annual report and then sitting back to hear a debate which would be a paean of praise to what had been On the other hand there were the

Young Socialists and the young rebels for whom the ritual of the Party conference with its interminable speeches and other formalities was alien.

What they want is more discussion. discussion as they understand it, which knows no bounds or limitations.

One of the Establishment is, quite naturally, Herbert Wehner who still seems to be indispensible for the Party, although he occasionally speaks of those "who still have something to look forward to" which presumably indicates that he has resigned himself to the fact that he has little to look forward to.

He spoke for more than an hour, and the relentless volume of his voice during that period was astonishing. Basically his report was a sober reflection of what the SPD Parliamentary Party has achieved in the last two years.

Even when he is speaking of such banal achievements as the Regensburg-Passau autobahn or industrial developments in the Saar he gives the impression that he considers these a wonder of the world before which all his enemies and the enemies of the SPD should cower in awe.

He quoted extracts from a Gustav Heinemann speech with such explosive force that he seemed to be pointing out to the President what the words really meant and how they should have been delivered.

Herbert Wehner received applause at the end of his speech and the sheer physical effort he put into it, it must be agreed, was impressive.

Günter Grass in conversation with Defence Minister Helmut Schmidt (left) and Jochen Vogel (right) Mayor of Munich at the SPD party conference in Saarbrücken

Then came Economic Affairs Minister Karl Schiller who was immediately besieged by photographers. We are no longer so used to seeing and hearing from him. Herbert Wehner had, the day before, praised Schiller's achievements to the akies, yet another sign of how the party executive and the government believe they must stick together.

There were three major faults at this Party conference.

Firstly the Young Socialists who are always on the lookout for a chance to throw a spanner in the works by bringing up a debate on Party organisational

Secondly the rain that gushed down for 48 hours solid and turned the parking lots on Saarbrücken's fairground into mud

Thirdly there was a highly inefficient

the fair's hall in certain places affected everyone equally, Young Socialists, old Socialists, guests, the Party executive and iournalists.

Catering facilities at the conference were poor, offering no more than Frankfurters, roast chickens and a cup of coffee for those who were lucky.

Obviously journalists were not expected to turn up. There were neither sufficient telephones nor a reasonable number of desks where journalists could

What did the left-wing say before the Party conference started? "Conferences are today a welcome opportunity for a Party executive to show its mettle.

"Leading members of the Party strike up an orator's pose and beg for applause. Delegates get a sense of the big wide world when the press, radio and television present the conference to the public." This breath of the big wide world obviously had not yet permeated to Saarbrücken fairground.

Heinz Murmann

Günter Grass speaks to the SPD on the SPD

nternationally famous author Günter Grass addressed delegates to the Social Democratic Party conference in Saarbrücken. For many a long year voters in this country have been silent, but now, since the 1969 election, they have begun to voice opinions.

This new political interest, has been the result of bright ideas emanating from the Social Democratic Party and its sup-

Günter Grass maintained that the Social Democratic Party, once an active member of the Grand Coalition, was badly in need of support in the early part of last year, resignations and concern over the litture of the Grand Coalition had a laming influence on the Party. .

Still further the younger generation impregnated with the habits of protest no longer saw the cool calculations of power politics as worthy of support. The Grand Coalition alienated youth.

According to Grass the Party had given too much attention to the division of the generations and insufficient attention to immediate political problems.

The Social Democrats lack a valid heory. They can neither turn towards the father figures of Marxism nor fashion a streamlined belief in progress by means

of a pragmatic approach.
Grass continued that there was a danger of the SPD as a political organisation not being sufficiently aware of the ultimate effects of its policies, and falling short of its own standards.

The party should not allow the merits and result of its own policies to be mined by a kind of general "Boljahn-ism". Günter Grass said: "When I compare

the case of Boljahn in Bremen with that of Littmann in Frankfurt, when consider how much intrigue went on within the Party, and call upon experience to solve the problems, experience that I have gained in Berlin or Baden-Württemberg, the number of fossils i ling lying around would be enough to make up a fair sized cemetery, whose gravestone inscriptions, left and right, cannot elicit any piety in me." :

In Günter Grass's opinion it was the task of people who voted SPD not to leave the Party on its own but to open it up from the outside and give it a good airing. The SPD should not, he continued. be afraid to utilise the knowledge and the unrest of its voters.

In the contradictory juxtaposition of reason, expressed in scepticism, and irrationality, which is expressed in totalitarianism, Günter Grass carries the standard of critical rationality amid the appleuse of the Party conference and the encouragement and thanks of Herbert Wehner. (Frankfurter Allgemeine Zeitung für Deutschland, 13 May 1970)

B HOME AFFAIRS

An alternative National Day - 18 January

With the exception of 17 June and 1 May all public holidays in this country are Christian festivals. Germans are traditionally a people that take great pleasure in public holidays. Many nations in the Christian world do not celebrate two days at Christmas, Easter and Whitsun.

Good Friday and Ascension Day are also public holidays by law and Catholics celebrate Corpus Christi while Protestants

have their day of prayer and repentance.
Other days like Epiphany on 6 January
and Reformation Day are not general public holidays but are respected by state

All these public holidays are publicly celebrated. It is not only the churches that honour the days with special religious ceremonies. Amusements that are not thought compatible to the character of the holiday are forbidden and radio and television programmes also bear this in mind when arranging schedules.

Attempt to change **Basic Law**

ore than ten years ago one in-fluential constitutional lawyer in the Federal Republic attacked the creators of Basic Law as not being particularly blessed with imagination when they used the old legislative divisions; of the

Since then Basic Law's federal structure and the division of responsibility between central government and Federal states has become and increasing irritation that obstructs unified solution of urgent prob-

structs unified solution of urgent prob-lems — and not only in the educational sphere. There have already been demands for a total revision of Basic Law."

Basic Law envisages three types of legislation: the exclusive legislation of the central government that completely ex-cludes all initiatives by Federal states; concurrent legislation where Federal states; es can act only if the central government does not control the sphere in question and finally framework legislation. In the latter the central government, can only latter the central government can only draw up the general framework.

Concurrent and framework legislation has resulted in the criticism, accepted in part by the Federal states, that their powers should be restricted so that uni-fied solutions could be enforced throughout the Federal Republic.

No clear guiding thought can be seen in the list of objects for which the central Basic Law. The press and films are included along with nature conservation and payment of wages.

But framework powers do little to guarantee unified regulation. This is shown by the Federal states' varying pay regulations. Federal Home Affaits Minist. er Hans Dietrich Genscher has therefore announced a bill to amend Basic Law so that pay regulations can be brought into concurrent legislation.

Basic Law has drawn up a 25-point list for this area of concurrent responsibility. The central government can deal with the areas of the economy, labour, welfare, divil law the penal code and the furtherairce of scientific research.

But it has long been clear that this list is inadequate. At present a re-division of powers" for the purification of water and the atmosphere and for noise abate ment is being discussed. Paul Lersch.

All children here celebrate St Nicholas'
Day and Catholic children at least celebrate St Martin's Day. What singles Germans out from almost every other nation is that there is no single holiday for children or adults in this country that is not of Christian origin or Christian tradi-

> of grief and meditation. The provisional nature of the Federal Republic was given a symbolic day with the 17 June. The Day of German Unity expresses the fragmentary nature of the Pederal Republic as far as territory is

tion. 17 June is not a holiday but a day

It must be the only National Day that does not proudly celebrate what has been achieved but looks sorrowfully at what has not been achieved.

This day commemorating the conrageous revolt of workers against com-munist opression on 17 June, 1953 in East Berlin was a source of embarrassment from the very beginning. No one knows how the nation can celebrate the day but there is more to it than this.

Politicians have long called for contacts with people in the German Democratic Republic (GDR), even Communists. They have had official meetings and helped in their small way the progress of inter-

But on 17 June they all had to stand at the demarcation line with torch ablaze and speak of inalienable human rights. the right to be united and the injustice of

public holiday for political reasons. Even without the new developments in inter-German relations, the day would have to have been given up as it was never accepted as a national day by the population of the Pederal Republic and could

never be.

The present Bundestag session will probably abolish 17 June and replace it with
a proper day of national celebration. But
on which day would that be held?

on which day would that be held?

8 May, the anniversary of the capitular tion in 1945, can be ruled out unless the Federal, Republic is to include itself among the victorious powers as Communists in the other part of Germany do. It could be held on 29 September, the day of St Michael, patron saint of the Germans. But this choice would be an escape into the notice would be an escape into the notice of the saint of the second could be an escape into the notice would be an escape: into the non-political sphere and can no longer be recommended in view of the relationship between Church, State and society that is daily becoming more and more lukewarm and indifferent:

Although 20 July 1944 takes up a morally honourable place in German history it must still be ruled out. In all its

Republic has acted against the ideas of those people who instigated the attempt on Hitler's life and the subsequent coup d'état. Again a failure and not an achievement would form the basis for national

THE GERMAN TRIBUNE

The only date left is 18 January, the day when the German Empire was founded in 1871 and the actual day of German unity. By choosing this day the Federal Republic would be acknowledging the continuity of German history and the

At the same time it would honour the peace policy of the founder of the Empire and repudiate the ideologies imposed upon it by the bad consciences of the governing generation - the pacifists, the Europeans and supra-nationalists and teh unhistorical anti-Prussians who see a gradual decline from Luther to Frederick the Great and thence to Bismarck.

18 January would be a good day for public celebration — and it, could be celebrated right away as a centenary. It would be a day when our country could return at last to political normality and recognise itself in a great historical act.

(CHRIST UND WELT, 8 May 1970)

Away with oaths call by the President

has been no secret that the Federal Republic President, Gustav Heine-mann, favours the liberal wing of the Social Democratic Party. This is shown once again by the discussions he began on the subject of abolishing oaths of office.

Apart from the President the Free Democrats in North-Rhine Westphalia have also given their attention to this matter. At the Party conference they officials and military men swearing on oath of office was declared "incompatible with the democratic spirit of our

The Party considered that "Loyalty towards a democratic employer and democratic laws conforming to our constitution" must be matter of fact for every democrat without his having to awear an oath to this effect.

In President, Heinemann's opinion a formal declaration of loyalty should not be abolished without further ado but should be replaced by a professional code of honour for officials and men serving in the armed forces,

A similar produce would apply to witnesses in a court of law. The motivation behind an lofficial; a military, man or a witness should be a call of honour.

Oaths, even in their secular form, stem from religious sources. Religious principles, however, are no longer generally binding for a pluralistic society.

· It remains to be seen whether the new proctice in this sphere will conform to the realities. (Handelsblutt, 24 April 1970)

Review life sentences after twenty years, Minister says

I n a newspaper interview Federal Jus-tice Minister Gerhard Jahn asked whether all criminals serving life sentences should not have their case reviewed after a period of twenty years.

The Minister made this proposal with the aim of having the two central issues in the penal code — guilt and rehabilitation into society - dealt with practically and

Gerhard Jahn's suggestion is basically the logical extension of the new regulaflons in the general section of the penal code. These refer to rehabilitation as the (Dis WELT, 4 May 1970) meaning and purpose of punishment.

With this proposal Jahn has fouched upon the whole problem of life sentences, the part of the legal system dealt with by sixteen professors in the latest plan for reform entitled Punishable Offences

against Persons.

The professors question life sentences as they destroy the personality and are therefore inhumane. These are the same objections as those put forward by Jahn.

present stage of the discussion Jahn should grasp the initiative and put his views into practice.

Government publishe interim report on the state of the press

A government bill is now in preparation to introduce aimual press a an interim report on the state of pa and broadcasting that has just been p lished in Bonn. It is estimated that first statistics will be for the year 197

In the interim report the government said it believed that freedom of the pa

scene" in 1969 was characterised by a

oujections as those put forward by Jahn.

If life sentences are not abolished at the resent stage of the discussion Jahn ould grasp the initiative and put his additional frequencies would have to have also opened up new ways for the church in memoranda and in waking university television could mean of the church to the fact out of practice.

(Kleier Nachrichian, 6 May 186)

But the uniting body, the body that determined the direction the Church was to take, declined with the synod. The EKD conscience grew silent. It was hardly realised that neglect in the sphere of education affected not only the life nerve of the German nation but also the heart of the Evangelical Church.

The EKD could not even accomplish an adequate financial agreement between the Churches. This task, forced upon it by public anger, was technically so simple to

The most important move in German Protestantism occurred without the help of the EKD. This came about last spring when the spiritual opening of German Lutherism resulted in the overcoming of the sixteenth-century confessional boundaries between Protestants.

The present age has become a witness of the decay in the EKD's spiritual powers. Is there any prospect of a turn for the better? The dramatic resignation of Hans Puttfarcken, the synod chairman shortly before the opening of this synod because of irreconcilable differences of interpretation of questions of legal forms could have a purifying effect.

It shows that this is not the time to avoid decisions by flecing into the jungle of legal theories. First the seats in the synod and EKD council vacated by the GDR members must be filled. Keeping these seats free as a gesture would only be food for dreamers who consider reunification possible in the foreseeable future.

But these are organisational questions. The important thing here is to attract the younger generation and people with critical imagination.

The tasks facing the Church demand all its powers if the contribution of the Evangelical Church is once again to gain importance. The synod must prepare the ground for this. Its main task is to determine the Protestant way into the future in the West of the divided country.

Dr Ludwig Raiser was elected to be head of the Protestant Church in Germany at its fourth synod in Stuttgart. Bishop Kurt Scharf (right) is the deputy chairman of

Commission proposes no divorce in first year of marriage

Federal Ministry of Justice has proposed that divorces should be forbidden by law in the first year of marriage.

After two years work the commission presented its first two reports to Justice inister Gerhard Jahn on 8 May. In thirteen theses on the reform of divorce law it proposed that the fallure of marriage should be the criterion for a divorce while the question of guilt should no longer play any part,

In future a divorce should be given if the two parties have been living apart for twelve months and agree to a divorce or, in cases of dispute, where couples have been living apart for more than five years.

In particularly difficult cases of dispute the commission proposes a hardship clause where a divorce cannot be granted against the wished of one of the parties if I

The marital law commission of the would be extraordinarily harsh or unjust because of special personal relations or if it meant serious economic hardship for the couple concerned or their children.

But this hardship clause would lose its validity if the couple had been separated

In fifteen further theses on the reform? social insurance law, the civil service law and welfare law with the aim of introducing special social isccurity for married women so that the financial dependance of a divorces could be overcome.

Maintenance after a divorce could be claimed only if a return to work is unreasonable or if living off other income

(DER TAGESSPIEGEL, 9 May 1976)

There was an unusual meeting recently in the Deutscher Kaiser, one of Munich's most elegant hotels. It was attended by some 120 people — all Catholic priests who had been released from their clerical obligations.

Most of them had come with their wives or fiancees. There were also practising priests who were sympathic to their cause and laymen interested in the blems concerned.

Those people who came along as observers to make sociological and psychoogical studies to discover resentment, appression, frustration and similar emotions in the behaviour of branded men (or the first signs of marital failure among the former celibate priests) were disappoint-

The ex-priests' wives could not be included in the category of suffrageties either. Nor were they obedient admirers of their formerly revered husbands.

If the problem of a Catholic priest's resignation or marriage (they do not always have to be concurrent) were not played up so much by the official Church and the boulevard Press it would not have been worth giving the public such an ripression of normality

One conclusion that was made in the The majority had given up their positivities congress. But he did send his recorders and in private conversations as the because of the ruling that priests representative of the final day.

Well as in associate working groups and miles remain college. Only a few had lost the final day.

The resolutions was that the Church would not their belief. Many however resigned the cap count (Frankfurter New Presse, 9 May 1970).

Ex-priests discuss their problems at Munich conference

better to discuss the more important questions asked by people today.

This work of enlightenment to in-fluence public opinion — taken by itself a backward looking phenomenon — was still necessary, participants at the congress said, because theological findings made a long time ago are blocked by antiquated ideas within the Church and its hierarchy...

After a lot of work in smaller groups the anonymous view of the congress seemed to be that priesthood was not a rank or continual ordination but a function in which every Christian has specific

103 priests without office were interviewed in a survey and the results were submitted to the congress. None of them wanted to carry out the old-style priest's function as a married man but almost all of them would like to be of future service to the Church in one way or another.

cause of the problems involved in an

antiquated priestlycod.

The theological developments outlined here were most clearly expressed by those theologists who were still in office and

not by those priests who had resigned.

Those priests who have given up their office and formed groups in Municit. Frankfurt and Cologne describe them-selves as "priests without office." This is intended to express their readinesss to cooperate in the Church's renovation if the official Church attitude changes. This is already possible in many spheres in

some bishoprics. Hesse is one example.

The following resolutions were made and passed on to bishop in this country: the exipriests rejected the accusation of disloyalty made when they gave up their office: the Church's abligations to expriests should be carried out - this occurred only in half the cases recorded; ex-priests should be allowed to remain in the service of the Church without detrimental or senseless duties and obligations. such as a change of residence or a quiet. wedding; and the problem of priesthood and celibacy must not be omitted from

CULTURAL AFFAIRS

More money needed for more efficient public lending library system

n a Hamburg municipal library a A strapping fifty-year-old woman said to the librarian: "Young man, I want something on love. If you know anything

In a Cologne library an eight-year-old lad went up to the librarian and told him that he too was writing a novel. When asked how much of it he had already completed the boy said proudly: "Two pages. It's in my school exercise book."

School boys and adults of 45 and over are the most common users of public

In the Federal Republic there are about ten thousand public libraries for them with a stock of 29,900,000 books. Every subject under the sun is treated in these from cook book to Karmasutra, from Bible to ballistics, from Lenin to Lieder.

Very few people in fact take advantage of this education offered gratis. Ac-cording to Dr Gustav Sichelschmidt of the America Memorial Library only three per cent of the people in this country are regular users of public library facilities.

This average figure does not take any account of regional variations. Hanover's municipal library, for example, proudly claims that fifteen per cent of the citizens of Hanover use the library at some time. And it must be taken into account that country, particularly in rural areas, do not have library facilities in their vicinity.

"Librarians would be satisfied if on average ten per cent of people in this country were to use the facilities they offer," said Guido Hilger of the Federal Republic Librarians Association in Berlin.

This ideal figure is not even recorded in Cologne, the fourth largest city of the Federal Republic, which has twenty six public libraries. Of 800,000 citizens of Cologne 60,000 are entered in the files of

What Dr Sichelschmidt said applies to the majority of working adults here: "The public hardly takes any notice of

Why is this? Dr Horst Tilmmers who has been head of Cologne's Stadtbücherei since August 1969 complained: "People just don't see our small premises."

He is hoping for a new central library to be built on the Neumarkt, which "with the help of God and the politicians" should be begun at long last next year.

Even the peoble who see the small premises often have to return empty handed since the open libraries in the Federal Republic are only open in excep-

Take Essen for altypical example: On Mondays books are only loaned out in the afternoon, Wednesdays and Saturdays only two hours in the morning. And on the three other days of the week potential readers arriving at mid-day find the premises bolted and barred. When then should a working man or woman go to the library to borrow books?

Just how much longer hours of opening would add to libraries being used is shown by Scandinavia and Britain. The

night. A businessman in Birmingham can obtain books daily from eight until eight. The result is thirty per cent of people in Birmingham read in the public library. Longer opening hours are an essential if libraries want to serve citizens as a centre

of information and education. In the Federal Republic the excuse for the ocked doors is shortage of staff.

In fact behind the locked doors the staff that libraries have been able to employ are busy, sorting books, putting them in order, cataloguing them, registering them and sending out warnings about

Most of these chores could be taken over by electronic data processing, but with a few exceptions - Bochum and Berlin for instance — the computer age has made no mark on libraries. Rationalisation costs money

In a report from the Federal Republic Panel for Adult Education it is stated, "the book is the basis of all education." But education in this country must be

Keeping a library is one of the so-called voluntary services of individual towns and cities. When councils find the petty cash running short the first inroads are madeinto allocations offered to libraries, although as Dr Tümmers has said, "education investments only begin to pay off in the long term."

North Rhine-Westphalia's Education Ministry has allocated 2.7 million Marks for the state libraries for 1970. But this

Theatre audiences decline and decline

verall attendance at the ten theatres in the state of Hesse, including the Bad Hersfeld festival, fell by more than 50,000 in the 1968/69 theatrical season. Seventy-four fewer performances were seen by 2,222,747 people.

The largest fall in attendance was registered at Glessen civic theatre (33,000). Frankfurt municipal theatre (23,000) and Wiesbaden state theatre (22,500).

Increases of 24,000, 27,000 and 5,000 were, on the other hand, achieved by Rhine-Main state theatre, Darmstadt state theatre and Kleines Theater am Zoo

(Frankfurter Neue Presse, 29 April 1970)

shared among the 3,000 libraries in the state is little more than drop in the ocean, library in Goteborg in Sweden is open from eight in the morning until ten at according to Dr Tümmers.

The total budget for all libraries in the Federal Republic last year was 150 million Marks. But of this budget only twenty per cent can be given over to new books. Guido Hilger in Berlin said: "We need twice as much as money.

Of the 3.8 million Mark budget for Cologne libraries in 1969 2.5 million went on salaries alone. Only 500,000 Marks could be spent on books. This was sufficient for about 2,000 new publications. But each year about 25,000 new German-language titles are published.

The situation is even worse in small towns, for instance Celle. Celle has an independent council and therefore receives no subsidies. The city authorities scraped together 44,000 Marks for new books and left themselves broke.

Brigitte Weber, head of the Celle Stadt-bücheret said: "Small general libraries can no longer meet the public's requirements particularly on specialist topics, such as sychology or space travel."

More and more readers are calling for eductional books rather than books only read for pleasure during leisure hours. Figures for loans on text books have risen immensely in recent years in comparison to those for so-called light literature. But what use can a reader in 1970 find in a technical book published in 1960?

In North Rhine-Westphalia a circulating library has been established but this is only as good as its budget. If new publications are out of print immediately in one district people there will not be keen to lend them out to neighbouring districts.

Librarians are calling for new legislation granting money for libraries to local authorities that cannot afford them.

In addition to this suggestions are being made for making national scientific libraries and university libraries available to members of the general public.

So far only progressive Hesse has taken the initiative. New libraries legislation is at present receiving its second reading in the Hesse provincial assembly.

But Horst Tummers in Cologne is optimistic and thinks that concerted action by librarians in the future will solve many of the problems and shortcomings in the Dörte Voland

MODERN LIVING

No. 424 - 28 May 1970

International Design Centre opened in West Berlin

The revolving glass doors of West Berlin's International Design Centre have recently been opened to the general public. Visitors first have to work their way through a wall of plastic panels proclaiming slogans such as "Can the future be saved?" and "Grass widows." Once this is done - and no particular

difficulties arise - the visitor enters a darkened room in which parodies of advertising slogans succeed one another on six screens. They are followed by a third room in which Man's totally polluted environment - land, water and air - is

Comic strips on revolving drums clearly indicate the dangers involved. The form is amusing; the content is not.

The visitor can also pick up telephone receivers and listen to a succession of famous texts, such as Hundertwasser's Green-Mould Manifesto, Mies van der Rohe's "Form as an Intellectual Principle" and Raoul Hausmann's "Appeal to the Imagination."

By this stage at the latest the visitor has the opportunity of making public his dissatisfaction or delight by writing his opinion on a stretch of wall provided for the purpose.

The visitor is invited to give his order of preference in the first-floor show of unudged exhibits. Women are given ten red balls, men ten blue ones to award to the

Decision-making is always a tiresome business and no matter how good the idea Colan was one of the most really of asking manufacturers questions about poets of the post-war ora and won in their exhibits was, the sight of rows of prizes for his works, including the G tastefully designed glasses, plates and Büchner Prize, the Bremen Arts Prize cutlery arranged on the supplied the North Rhine-Westplalia Art G tables surrounded by functional chairs is But in recent years the ferror blows through the first floor.

Out of spite, as it were, the reviewer's red balls were awarded to an oil-fired boiler, a streamlined automatic iron, a photo offset machine and, as a change from functionality, a black-andwhite omamented velvet curtain.

"This product is a form," the attached B onn's Beethoven Prize for 1970, sheet read. "Not a uniform. Not a reform. Not a platform." The curtain manufacturers would surely not be making fun of the Design Centre's questionnaire!?

Huber received the award for his on the Design Centre's questionnaire!?

There can certainly be no doubt that the West Berlin Design Centre with its ambition and concentrated involvement has further-reaching ideas in mind. The balle Orchestra conducted by Volker's gentleim.

(Hannoversche Aligameina, a May 19 Muestion "Can the designer save the World?"

This, at any rate, is the theme of the Design Centre's first brochure, which was published recently. The brochure contains comments by 46 designers, architects, educationalists, economists, sociologists, art historians, political scientists, philosophers and futurologists on pressing problems relating to dealing with the

Debate again centred round three issues: the shaping of a humane environment, the function of design and the possibilities open to the disciplines in question.

The brochure ranks among the most exciting reading in years. A number of fundamental ideas recur in many of the international contributions. They include, first and foremost:

- the mutual dependence of enforced consumption and inhumanity,

- the systematic destruction of a Nature felt to be inexhaustible and thus the self-destruction of Mankind, the increase in civilisation diseases

the pillorying of capitalist systems, and, finally, scepticism about the pos-

sibility of generating humanity through design at all.

To summarise it could be said that most comments do not reflect unbounden optimism. As Man's environment increasingly compels him to act in a certain way his leeway is radically reduced. As yet the appeals of people who are aware of what is happening are too hesitant to confront the compulsion of circumstances with a compulsion to chan-

go the rules of the game.
Salvation, so it would seem, must be enforced, realisation dictated, as it were; by government legislation on, for instance pollution. Time can no longer be lost.

At the same time the Design Centre has taken its first steps in the direction of unlimited publicity. A forum and a working council are to be constituted in the

course of the year and everyone capable of maing a qualified contribution towards shaping environment is called on to lend a

This amounts to a cautious attempt to gain the unreserved support of a interdisciplinary group of people who are aware of the dangers involved. The Design Centre questionnaire was, characteristically enough, sent to a great many artists in the broadest sense of the term.

Oddly enough, the writers among them were sparing with their replies. Neither Ginter Grass nor Hans Magnus Enzensberger, Alexander Kluge, Max Frisch or Peter Welss replied.

Politicians Franz Josef Strauss and Karl their silence. Outside the more immediately concerned the crucial importance of the enterprise is evidently underestimat-

"The designer's function is assuming more importance than ever before," Sir Paul Reilly noted in an address to mark the opening of the Design Centre. The term "designer" may well not for long remain an isolated and encircled concept.

In any profession bearing the slighter. relationship with the environment design is not only possible but necessary. Design is a platform for the improvement of what already exists.

Lucie Schauer (DIE WELT, 6 May 1970)

selection panel and built in loudspeakers was exhibited at the Berlin Design Centre.

Deutsche Oper visits Japan

C hould Japan ever come to start on more interesting productions, met with Oper of Berlin will have stood godfather and there will be every reason to suspect that the natural relationship is even clos-

The company, 360 strong from general manager Gustav Rudolf Sellner down to the lighting technicians and stage-hands. recently concluded a six-week tour of Japan, the most extensive and complete tour of the country ever undertaken by an opera company.

The tour cost seven million Marks, which were provided partly by this country, partly by Japanese patrons. The difference between this and other tours was the presence of the entire company.

Other troupes seldom enough take an orchestra or a chorus with them. None take technical staff. Yet this was the only way to show the Japanese public a comprehensive range of Western opera.

On its three tours (the first two were in 1963 and 1966) Deutsche Oper presented fifteen works, including all main streams and works of the musical repertoire: Mozart and Beethoven, Wagner and Verdi, Schoenberg, Alban Berg, Henze.

The company did its best in choreo-graphy and set, in voice and orchestral sound. Their hosts, who are used to outstanding individual performances by visiting artistes, were impressed by the spirit of the ensemble, something they had never before been in such a position

Guest performances by the entire company would, of course, have been impossible without the close technical contacts forged between Deutsche Oper Berlin and the Nissei Theatre over the past eight years. Foreign artistes and groups often visit Tokyo yet often enough fall foul of technical errors, omissions and

Schiller, cultural philosophers Klages and Not even the most superb soprano can Mitschedich and American pop prophet rescue a performance when the lighting is Timothy Leary were all conspicuous by wrong, her opposite number is stending wrong, her opposite number is standing on the wrong spot and the technical apparatus functions poorly.

The Japanese public consumes Western music with an avidity that bears witness to a voracious appetite. No city in the world can equal the range and abundance of music performed in Tokyo.

The public is extremely receptive, uncommonly disciplined and eager to learn despite being completely uncritical and lacking in a trained ear for modern music.

This year Wagner's Lohengrin and Weber's Der Freischütz were the greatest successes with the public. Alban Berg's Lulu and Schoenberg's Moses and Aaron.

ready approval by the critics but only moderate applause.

Mozart's Cost Fan Tutte and even Verdi's Falstaff, in which Dietrich Fischer-Dieskau gave a delightful performance, failed to reap the applause they deserved too. This is, of course, partly due to the fact that the Japanese have anything but a Latin temperament and seldom abandon their reserve.

Wieland Wagner's production of Lohengrin was praised by the critics for the dream-like stroophers and striked best ty (Tokyo Shimbun). Compared with Italian opera, the mass-circulation Yo-miuri wrote, the Berlin opera sets great store by harmony with the result that soloists remain under the control and in the service of the characters they portray.

Indeed, in addition to a number of sololats there was particular praise for the ensemble performance, the sets and the production. A number of critics were not, on the other hand, wholly satisfied with the quality of singers in Cost Fan Tutte and Der Freischütz.

The beginnings of Deutsche Oper's scries of guest performances go back to 1962, when the rich and powerful patrons of the Nissei Theatre sent young, dynamic Keita Asari to Europe to select an opera for the inauguration of the theatre the following year.

He opted for the Berlin company, both because it seemed to him more up-to-date intellectually than other troupes and because he was particularly impressed by the emphasis on the performance of the ensemble, something that the Japanese are quick to appreciate.

So it was that Gustav Rudolf Sellner and deputy Seefehiner made contact with Japan. In 1963 the Nissel Theatre opened llo attended by the Emperor, a performance donated by President Lübke, who was visiting Japan at the time.

The presence of the Emperor was such an unprecedented honour that is was virtually a matter of course when the organisers of Expo 70 in Osaka opted for the Berlin company when faced with the job of selecting a company to hold the opening performance of the World Fair.

It remains to be seen how the seed sown in Japan by Deutsche Oper will develop. There is a world of difference between Gagaku, the millenia-old music still played at the Imperial court, and Alban Berg's Lulu, not to mention Hans Werner Honze's Elegie. Thomas Ross
(Frankfurter Aligemeins Zeitung
für Deutschland; 30 April 1970)

The vicar of Tutzing recently called on his congregation to be particularly generous with donations "The money," he said, "is for the children, will go towards kindergartens."

In the Evangelical Academy, a few streets away, university men, politicians and members of the profession were attending a conference organised by Bavarian Radio, dealing with the issue of how, other than by sacrifices and alms, society can be of assistance to children of

Agreement was quickly reached on an analysis of the present situation. Statistics document the sad fact that only one child in three between the ages of three and six has the opportunity of attending what is usually an overflowing kindergation.

Seventy-four per cent of kindergartens are maintained by the two major Churches. The 6,000 or so kindergartens run by Caritas, the Roman Catholic charitable organisation, which represent no less than 43 per cent of the total, receive a paltry two million Marks a year in government assistance, which amounts to all of 25 Marks a month per individual Caritas

Where kindergartens are provided they children's depositories providing the little child in the first few days of life that

ones with a roof over their heads and a determines the entire future life (school

Caritas, which conducted a statistical survey in its kindergartens a year ago, concluded that they had one trained kindergarten teacher per 39 children. There cannot in the circumstances be the slightest prospect of individual attention.

Yet according to recent definite conclusious reached by psychologists children of kindergarten age gain impressions that are of importance for the whole of their

Parents in this country have always made heavier weather of educating their children than mothers and fathers in many other countries. The drill of the past ("Do this!", "Don't do that!", "Sit straight!") has in many cases given way to

The number of parents who still play with their children grows smaller and the number of presents given as a substitute for genuine attention is on the increase. 'The older they are, the more trouble they are," a proverb runs and many parents still go by it.

Yet in the light of the latest conclusions reached by psychologists and educationalists the reverse should be considered true. The idea that early childhood up to school age represents a kind of protected zone in the child's development has long since been abandoned.

"We even feel," says Bochum psychologist Professor Heinz Heckhausen, "that

Psychotherapists point warning finger at society's repressive ways

The latest development was mister C ivilisation and society have grown to be our real patients." Professor appointed State Secretary in the land most of the Twentieth Ministry of Education.

A working party first drew grand organisational model for the case school. The draft was then approved a headmaster eight masters are decided as the school conference.

Eckart Wiesenhütter of Berlin commented on the opening day of the Twentieth Lindau Psychotherapy Week. Were doctors allowed to do anything of the kind these two patients are enough to drive psychotherapists to the brink of despair.

The difficulties that arise can be compared with a Himalyan peak that the pared with a Himalyan peak that the

psychotherapist has to scale with the aid of gym shoes and a map of the North

After decades of stubborn resistance society is on the point of admitting to the successors of Freud, Adler and Jung that it is in need of treatment. Proof is provided by attendance figures at Lindau.

Dr Helmuth Stoltze of Munich expressed the view that this sudden rapid rise in attendance figures was doubtless due in part to the pressing problem that patients are for a doctor nowadays.

"There is an unimaginable dearth of doctors with psychoanalytical training poth at hospitals and in practice," Professor, Werner Schwidder of Göttingen not-

and the state of the state of the state of

Even assuming only 150,000 people are in need of psychoanalysis (the true number is doubtless far higher) 3,000 to 4,000 analysts would be needed. As it is there are no more than 1,000 in the country. "A dreadfully high deficit," Dr Schwidder commented.

And those there are have all cause to ask why they in particular should be subjected to permanent stress. Psychotherapy is not, as many people believe, the prescription of mental medicine in the form of friendly listening and good advice without the slightest involvement on the doctor's part.

It is, as Professor Walther Winkler of Gütersloh stated, a continual process of calling the doctor into question.

Dr Wiesenhütter's lecture conveyed some idea of how urgently needed this questioning is. As the classical avant-garde of socio-psychological medicine the psychoanalyst views the world as a world

It is a world from which he cannot extract himself - any more than obvious cases of illness are the only patients in need of a doctor nowadays.

Members of communes, advocates of group sex and wife-swapping, all of whom claim to be the heraids of a new world, may be the representatives of transitional

Yet are they alone in being neurosis suspects? Or do not neurotics uncover a weakness of society as a whole?

prior to) sex partners must match intelfectually, emotionally and socially, otherwise their marriage is likely to prove a

failure.

Today's family of three or four, which in the course of powerful socio-dynamic changes has superseded the large family over the past few decades, will probably not survive long, Wiesenhütter reckons, as it is proving incapable of coping with the tasks it has to perform. Crucial human qualities are allowed to strophy and neuroses to flourish.

Is the situation really as bad as this, Dr Wiesenhütter wondered. May not the psychotherapist, who deals mainly with

psychotherapist, who deals mainly with the emotionally ill, be overestimating the extent of the neurosis epidemic?

"I have many contacts with so-called normal families," Dr Wiesenhütter ansered. They too contain the germs of deep-seated disturbances evident in the case

of manifestly sick persons.

The good old days were no better either. The fact that there were as good as no divorces, apart from in the best families, is not evidence of a better standard of morality.

An important factor is that a few

generations ago most wives died of anaemia after countless pregnancies at Sexual education provided with a good deal of honest ardour and, for puritans on their successors. Divorce by childbirth. about thirty. In death they made way for

In the good old days people were no less afraid of death, poverty, loncliness and so on. The family and religion, regardless which, provided protection.

They no longer do so.
Nowadays salvation is sought mainly in achievement at any price, in conformism in every case and in renunciation of individuality, Professor Karlfried Graf Dürckheim of Todtmoos felt. This longing represented an obstacle to inner maturity. Bank accounts and public office are social therapeutics with massive side-

People who are successful in industry. commerce and politics, Dr Dürckheim noted, account for a large percentage of emotional failures in need of treatment.

THE ECONOMY

Recent economic relief measures not enough

This country's economy is still riding the crest of a high period. The number of contracts being completed and orders accepted in the Federal Republic is continuing to increase.

The great bulk of these is coming from domestic sources. Industrial production is rolling on at a high rate of revolutions per

Growth rate records are being recorded in just about every branch of the Federal Republic industrial economy.

All forecasts made by the Bonn government at the beginning of this year in its annual economic report have been far surpassed by actual economic develop-

The most recent quarterly report from the Economic Affairs Ministry has for this reason stated with resignation that the economic situation in this country in the early spring was of such a nature that a clear cut diagnosis and sufficiently accurate forecast of future developments was exceedingly difficult.

The wave of price increases which began to speed up noticeably last autumn is still not ebbing. In 1968 the cost of living rose by 1.6 per cent, in 1969 by 2.7 per cent and the tendency is still rising, possibly towards feverish heights.

which is taken as a yardstick for the stability of our currency, although it is only a limited guide, stood in the first quarter of 1970 at around 3.5 per cent above the level for the same period last

Production costs for industrial manufactures have continued to climb at an ever increasing rate. Whereas the average increase last year was only in the region of two per cent, in the first months of the current year an increase of more than six per cent was noted.

The most serious situation appears to be in the building trade where a conserva-tive estimate by the Federal Republic Institute for Economic Research forecasts a yearly average increase for 1970 of at least twelve per cent.

Chancellor Willy Brandt's reassurance that the Federal Republic economy, inasmuch as prices and cosis were concerned, was over the hump cannot hide the fact that depreciation has entered a perilous

In the face of an avalanche of wage demands in various sectors of the economy it seems safe to say that developments in costs and prices in the coming months will become even more ticklish.

Further wages and salaries inflation is unavoidable if this trend continues. Real wages in the early months of 1970 were fifteen per cent up on the comparable period of 1969 and the year before. But the growth in productivity is only six or seven per cent so that the rising costs per product is at least seven or eight per cent.

The present inflationary tendencies are particularly perilous since the increasing excessive demand on Federal Republic industry is allowing cost increases to be passed on without penalty to price levels, as Dr Otmar Emminger, the Vice-President of the Bundesbank stressed recently.

The continued spiral of prices and incomes increases could plunge us into the worst year of inflation in post-war the worst year of inflation in post-war requirements and can in fact only just times, apart from the crisis brought about keep their heads above water on their living will rise by approximately four per wall of import an export duties.

cent. Revaluation, which was considered to be the miracle cure for rising costs, has proved to be too weak.

THE GERMAN TRIBUNE

The fact that the exchange rate of the Mark is continuing to go up whereas the value of the currency here is plunging faster than in all previous boom periods has proved to be a grave disappointment to the advocates of revaluation. So has the fact that production prices here have been rising more steeply for months than in other industrial nations.

The much vaunted but little-supported idea that rising prices in various countries are interlocking factors in various economies seems to be further undermined since revaluation of the Mark and is not fulfilling its functions. The idea that relatively cheap imports help to check price rises in a country is not working.

Other economic policy measures that the Social Democrat and Free Democrat coalition put into practice are proving more and more just drops in the ocean.

The financial brokes applied by the Bundesbank are taking effect very slowly. They will only be reflected in price indices by the autumn or even later. Before then the idea of letting off the credit brakes a little will not be seriously

The tempo of depreciation at the moment should not be underrated. An annual loss of purchasing power of around four per cent means that after lifteen years or so money will have lost half its value. This is not harmless, it hits savers

It is not sufficient for the government to console itself with the idea that the SPD's former coalition partner, now the Opposition, disobeyed the laws of money stability last year and the inactivity of the government's economists to counteract price rises can no longer be excused in

The government will not be able to avoid having to reformulate its economic policy aims as soon as possible. The present situation leads us to fear that the government's main aim is "growth at any

On the import side the Federal Republic is Liberia customer taking nearly a third of Liberian exports. Our high level of trade Third World countries is largely a result of our great need for the raw materials

Closer trade cooperation with Poland

Further steps have been taken by the Federal Republic to ease the import restrictions on Polish goods.

This country's special ambassador, Egon Emmel, and the head of the Polish kowski, have exchanged letters, which have led to the complete removal of restrictions on import for 1,200 articles.

A number of other articles will be imported in greater quantities as a result of the agreements they reached.

The Bonn government could not agree to the Polish wish for a complete liberalisation of trade, since certains branches of industry in this country have to be

This latest agreement between the two countries does not involve the signing of the original overall treaty for increased industrial and technical cooperation wanted by both sides.

Hamburg continues to be important trade centre

amburg is the most important centre . I of foreign trade in the Federal Republic. Close on 2,000 of this country's 5,000 firms dealing with other countries have their headquarters in the Free Han-seatic port of Hamburg.

Added to this there are countless thousands of firms that do not deal entirely in foreign trade but devote at least part of their business dealings to export-import

Foreign trading concerns act not only directly as importers and exporters, but also work as export-import representatives, forwarding agents, and import

In addition to this several foreign firms have set up subsidiaries in Hamburg.

Hamburg had a 26,100 million Mark share in the Federal Republic's foreign Trade with USS trade last year, equal to 12.2 per cent. 19.2 per cent (19,000 million Marks) of Federal Republic imports and 6.2 per continues to show cent of our exports (7,100 million Marks) passed through the Hanseatic city on the

There was a considerably greater participation from Hamburg based firms in the import of various individual products, woif, President of the Federal Republic by such as tea (66.8 per cent of all Federal Conference for Industry and wooff, Conference for Industry and wooff, Conference for Industry and wooffee (55.2 per cent) and tropical fruits (39.4 per cont).

Hamburg's importers brought in from Europe more than 7,840 million marks

ed attention to the continually expan European Economic Community (EEC) contacts between this country and 1,700 million from the European

xpansion of mutual trading. Imports to Hamburg from the East He called to witness the good! Bloc stood at 712 million Marks. From figures with the Soviet Union lasty America imports via Hamburg were worth proof of the economic ties between 4,260 million Marks, from Asia 3,600 two countries.

Setting aside the major deal is Marks and from Australia 210 million

G.L. Zhurbenko, the acting Minitate technological equipment and autor schemes, named the Hanover Fair at 2,020 million to EFTA.

Exports from Hamburg to Europe last year stood at 4,390 million Marks, of which 1,770 million were to the EEC and 2,020 million to EFTA.

Hanseatic exporting firms sent 242 million Marks worth of Items to the East Hannoversche Presse, 28 April Bloc. 1,075 million Marks worth of exports were shipped to Asia from Hamburg in 1969, 906 million Marks worth to America, 554 million to Africa and 66 million to Australia.

... More than half of this country's transit goods go via Hamburg. There are 1,200 Hamburg firms dealing with this trade. Herbert Pavel, who in the past by Hamburg firms dealing with this trade. For example they buy cocoa from Africa such cooperative measures abroad, por such cooperative measures abroad,

Hamburg's foreign trading organisations have a vast network of business link-up's. They have an extensive knowledge of the market that has come down through years of tradition and which is constantly boosted and brought up to date by a

For some years now there has been a It is also possible to use the DEGs changing tendency. Raw materials and middleman between companies will work jointly on foreign soil in agricultural goods, which have always been the mainstay of Hamburg importers Pavel must be congratulated for its increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increase in the markets are the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion that it is better to keep a is by no means so marked as that for rein on foreign markets in this way rather than the increased importance of such wares opinion.

visit to Volkswagen's Kassel plant, the largest consumer of magnesium here.

nical items and complete factory plant

continue to increase steadily.

By tradition Hamburg's foreign trade is preponderantly directed overseas. But in this respect too there has been a change. A third of imports via the Hanseatic port comes today from Europe. The per-centage of imports from EEC member countries has risen to twenty.

Exporters too are directing more of their produce to the European mainland. The bridging of the gaps between the EEC, EFTA and COMECON groups is daily a part of our trading, according to the Hamburg Chamber of Commerce.

About 500 industrial associations and unions are registered in Hamburg.

There is close cooperation between foreign trade firms and Federal state unions - the East Asia Union, the Iberia-America Union, the Africa Union, the Middle East Union and the Australia-New Zealand Union.

Cooperation can also be noted between Hamburg's foreign trading firms and the World Economics Archives, the Foreign Department of the Chamber of Commerce, the Overseas Institute, the Africa Institute, the Institute for East Asia, Iberia and America, the Universities Institute, the Hamburg Exporters' Union, the Association for Wholesale and Foreign Trade (WGA), unions for individual products and other expert associations.

Hamburg and Berlin share the honour of being the largest industrial cities in this country, and Hamburg is the third largest built-up industrial area.

Hamburg's economic structure is made up of a great number of heavy machinery, shipbuilding, navigation, wholesale and foreign trade, retail, craftsmanship and service industries.

In all, these present a carefully balanced economic structure. This is shown by the fact that there are nearly 30,000 registered firms and another 42,000 independent

The industrial potential is made up of around 1,300 concerns with more than ten employees, excluding building and supply industries.

sium in the seventies."

A view of Hamburg's extensive port installations

Around 350,000 men are working on production lines in Hamburg. In trading and transport a further 300,000 earn a

By weight of numbers the smaller concerns are predominant in Hamburg Based on turnover, the following branches of industry are the most important: oil refining, tobacco, electronics, chemicals, metal, machinery, coffee and tea, veget-able oils and margarine, shipbuilding, rubber, asbestos, printing and brewing.

More than 14,500 industries employ

more than 100,000 skilled workers. Hamburg has 500 hotels, boarding houses and inns, 3,800 eating places (including a large number in St Pauli) and their managers will tell you that every third guest comes from abroad.

Hamburg is one of this country's mos important centres of domestic trade. 3,500 wholesale firms with 50,000 employees enjoy an annual turnover of around 8,000 million Marks.

15,000 retailers, employing 65,000 eople have a turnover of 7,500 million Marks each year.

Almost all important countries are represented in Hamburg by a consul-general or consul. When Moscow opens her consulate-general here there will be in all 68. (DIE WELT, 5 May 1970)

VW's 'Beetle' remains a world beater

nce again Volkswagen was able to announce proudly last year that with a turnover of 14,000 million Marks it had the greatest turnover rate of any industrial organisation within the Federal Re-

The Volkswagen plant in Wolfsburg produced more than two million vehicles in 1969, making it the greatest vehicle manufacturer in Europe and, beaten only by times American automobile plants life fourth largest car producer in the world.

VW boss Dr Kurt Lotz said at a press conference that Volkswagen plans to in-

vest 1,500 million Marks this year. The increased range of Volkswagen products has been noticeable as well on most lucrative export market, the United States of America. The Audi 100, Porsche and Volkswagen/Porsche models are being marketed by the new Porsche/ Audi division of Volkswagen of America.

Magnesium Association meets

Magnesium was first produced in-dustrially towards the end of the last entury. Production was boosted largely by the use of the metal in the munitions

in Frankfurt

Now the metal has so many applications that it is the seventh most industrially important metal with 188,000 tons

The main producers of the metal are the United States, Norway, the USSR, Canada and Japan. Within the European Economic Community the largest producing nations are France and Italy.

Magnesium serves as an alloy with aluminium and is used as a reducer in the production of titanium. It is also used by the chemicals industry as an anode corrosion protective.

Further uses for this light metal are in the space programmes and aircraft industry. But magnesium alloys are needed chiefly for the motor vehicle industry in the manufacture of motors and other Part of the conference programme is a moving parts and more recently the metal has been used in alloy form and molten for the manufacture of wheels.

The Volkswagen motor for instance contains twenty kilogrammes of magne-

Magnesium alloys are particularly useful on account of their low specific gravity. They are malleable and lend themselves to easy working and they possess good qualities in metal-cutting procedures.

Volkswagen and Mahle-Werke Limited were both awarded prizes by the Magnesium Association for their many years of work on developing magnesium-working

Natural sources from which the metal can be obtained are almost limitless. Magnesium chloride is the chief source and this can be found in saltmines, brine and seawater. In fact magnesium is sometimes known as "the light metal from the oceans".

Frankfurt was chosen as the venue for this conference since it is internationally recognised as a centre of the metalworking industries.

In fact Frankfurt's connexion with the light silvery metal goes back to the beginning of the century. It was then the headquarters of Grieshelm Elektron Chemicals factory, which is today Hoechst.

This company was the first commercial producer in Germany of what was then known as Elektrometall and is now called magnesium. (Handeliblatt, 6 May 1970)

More subsidiaries abroad should be established

It is for this reason that Herbert Pavel believes we can count on the export of this county's consumer goods, which needed before technical developments in make up about fifty per cent of all processing and in the quality of work produced by skilled labour is anything take a little.

But even Pavel makes no mistake that the present trend for markets to be won from the inside looking out, that is to say by producing consumer goods in subsidiary factories in other countries, cannot be

TECHNOLOGY

Battery-powered vehicles an answer to air pollution

Everyone is familiar with the noxious, noisy environment with which Man surrounds himself by means of urban traffic. Most people, after all, are road-users and most people are town-dwellers

Creatures of habit all, they accept the fact that with every breath they take they inhale polluted air and that they are exposed to traffic noise of a level likely to represent a health hazard. Yet it would be quite easy to improve the situation.

In the circumstances a commemorative volume entitled "Electro-Storage Vehicles" and published by Franz Steiner Verlag of Wiesbaden is of general interest. Its author is Professor Gerhard Wilke of Munich, who was assisted by a team of specialists. The book was commissioned by the Federal Republic Research Associa-

Electro-storage, battery-run vehicles that create half the noise and none of the exhaust gases of combustion-engined vehicles are no newcomers to either roads or track. Their range may be limited but

they have been in use since about 1890. The satisfactory results of initial trials led to the battery-powered railcars of 1907 which, improved from time to time,

Electrons dry paint

A coording to calculations made by a leading Federal Republic paint manufacturer the higher investment cost of

should be more than offset by lower running costs and greater turnover. The manufacturers are pressing ahead with the development of suitable paints.

Electron radiation dries paint far faster than other processes, penetrating more deeply than ultra-violet rays. As the rays do not heat the surface beneath, coats of paint and plastic on wood, cardboard, paper and plastic can also be dried by this (Hannoversche Presse, 24 April 1970)

of experiences with these vehicles entirely new electric railcars have been developed in this country since 1950.

At present roughly a third of the railcars used by Deutsche Bundesbahn, the German Federal Railways, are battery-run. They cover an average 250 kilometres (155 miles) a day, or twice as much provided they are recharged during the course of the day, and service some 5,000 kilometres (3,000 miles) of local

The first battery-powered cars were introduced in North America eighty years ago. They reached this country at about the turn of the century. At that time there were more electric-powered than combustion-engined vehicles on the road.

In subsequent decades combustionengined vehicles prevailed, with the unfortunate result that cars came to be considered as long-distance vehicles, and even though it is clear that combustionengined vehicles dangerously pollute the atmosphere through city traffic there can be no turning the clock back.

The electric car, were it even to materialise, would at best be accepted as a system.

Voters, local and state politicians could nonetheless direct their efforts towards creasing the number of electric-powered fore the war there were about 22,000 battery-run vehicles on the roads. Their number increased slightly after the war and until 1955 but a decline then set in and there are now only about 2,000.

The guilty party is without doubt the Road Traffic Finance Act of 1955. Up till then road tax was assessed on the basis of the weight of the vehicle not including batteries. Now overall weight is the criterion. Politicians have thus done their

The Bundesbahn's giant goods waggon on display at this year's Hanover Fel

best to ensure that urban traffic remains noisy and noxious by imposing a par-ticularly heavy tax burden on battery-

Knowledge of the consequences of harmful exhaust gases is still sketchy but those already known ought to be enough to make people stop and think.

Carbon monoxide poisons the blood, nitrous oxides foster smog, hydrocarbons, particularly certain benzopyrones, encourage or cause lung cancer and lead compounds attack the brain and nervous

All this is the motorlsts' own work. Cars account for more than forty per cent of atmospheric pollution. Pollution causbe reduced by the introduction of appropriate measures. But the avalanche of

exhaust experiments.

The millions of data collected day by day in the course of trials and measurements are fed to and evaluated by a process computer which also supervises the technical dotalls the technical dotalls technical details that need to be registered and documented -and there is no shortage of them in such a large-scale research facility.

Thirty-five million Marks have already

research and development work on motor vehicle electrical systems.

There are sixteen test-beds on which Bosch electronic fuel injection can be adapted to fit all manner of engines. They are to be joined by a further eight.

There will also be a roller test-bed on which speeds of up to 250 kilometres an hour (155 mph) can be simulated, up to 300 horse power braked itemperatures of the motor vehicle development can be expected to progress.

There is no shortage of examples: Electronic controls can help to solve the problem of noxious exhaust gases, also to There is a development and endurance of batteries or fuel cells, the propulsion by means to batteries or fuel cells, the propulsion by means to batteries or fuel cells, the propulsion by means to batteries or fuel cells, the propulsion by means to batteries or fuel cells, the propulsion by means to be batteries or fuel cells, and the propulsion by means to be batteries or fuel cells, and the propulsion by means to be batteries or fuel cells, and the propulsion by means to be batteries or fuel cells, and the propulsion by the batteries or fuel cells or fue

matic regulation of brakes and acceleration, air conditioning, a central warning system designed to supersede the many individual indicators on the dashboard, automatic adjustment of headlights according to payload, electronic washer and wiper, systems for headlights and indicators and finally a small process computer to supervise and independently regulate all functions of the vehicle.

The vehicle itself is not the only candidate for electronic development. There is a radio programme for motorists purveying information on road conditions, remote-controlled road signs and - to gaze a little deeper into the crystal bail electronically-controlled guidelines inlaid into the road surface as part of an automatic pilot system.

"Cars will be kept on course by a guideline cable, a system of loops and a process computer feeding vehicles with information that is transmitted from the control centre of the vehicle to the various engine systems. A central super-vision system will inform the driver when he must act or take a decision.

"It may be a while before this comes about: but at Bosch's Schwieberdingen laboratories work is in progress on issues such as this as though the fully automated electronic future were already here. Schwieberdingen intends to be at the top

When the time comes. Alignetic Zellung für Deutschland, 6 May 1970)

THIS ODD WORLD

The sweet life in the city on the Elbe

egend has it that St Pauli belongs to ousiness reps from Castrop-Rauxel and other provincial towns, Scandinavian businessmen and to a certain extent to the man in the polo-neck sweater with the jaunty walk, whose profession is often said to be of a Christian nature. Hanseatic people do not contradict this

and smile about the state of affairs. This is a startling understatement of fact, for of the four million or so visitors to St Pauli each year at least one third come from no further afield than Blankenese, Barmbek or other districts of Ham-

burg.
Why should they not? After all St Pauli is there for everyone as a wellknown advertising slogan says. This is a challenge that everyone should take up whether he wants to take his entertainment from St Pauli or arrange entertainment for others there.

Of the so-called enterprising types here, very few seem worthy of the title since they show little enterprise other than a bent for doing nothing.

This applies to around two thousand people — let us not call them pimps, that is a hateful word — operating in this area.

They wear sharp clothes, drive sharp cars, carry knuckledusters in their pockets and make money day in day out. Many of them are there for the protection of just one employee, others have

ten on their books. Every now and then the long arm of he law clamps down on them, when the

has given them. There are around 4,000 "girlfriends" earning cash for their boyfriends with a little cohabition.

In the old buildings of a street distinguished by the wrought iron gates at either end, in two barracks offering "love" with rendezvous courtyards illuminated only by dimmed red lights, in the rooms of 36 hotels, nine boarding houses or 74 rooms rented for professional reasons, or simply in the customer's own pad, the ancient trade is plied.

About half of the striking young ladies have a community conscience and also care for their own health and roll up once a week for a medical examination.

The rest are not so keen on the idea largely because they have no licence. Backgrounds are interesting. Some of the professional women are housewives

from good homes — well, can they help it if prices have risen at the local super-The actual number of worthy wives and Mums who add to the housekeeping in

(Stiddeutsche Zeitung, 5 lb The sympathy in which Mönchen-gladbach are held by the general public Strauss disarmed can be expressed in terms of figures too. This season no Monchengladbach player has been sent off; not even a penalty has A spokesman for Lufthansa der been awarded against a player of the as "perfectly correct" the league championship team.

plane, who refused to allow First Müller comments, interestingly enough, Strauss, CSU Party leader and It that "With 1 FC Nuremberg I always used to have to play hard because the defence was invariably under pressure.

Mind you, there have been very few serious offences this season, if the number of players sent off is anything to go by. Seven in 306 games is one the season's few really gratifying "records." Last year there were twice as many.

The number of penalties has also been reasonable. In the 1968/69 season seventy were awarded. On 47 occasions the penalty shot was successful, on 23 (oddly enough, exactly the same number as last year) the shot at goal failed to land

The 951 goals the eighteen clubs scored, an average of slightly more than three a match, can also be entered on the credit side of the balance. The fans can be satisfied with the number. In many other countries their fellow-fans had to make do with far fewer.

Most clubs were dissatisfied with the financial side of the season, though. Only five clubs (Mönchengladbach, Hanover 96, Munich 1860, MSV Dulsburg and 1 96, Munich 1860, MSV Duisburg and 1 FC Kaiserslautern) reported a better gate than last season.

On average the attendance per fixture declined from 21,000 to 19,000. In eight towns (Aachen, 10,400; Kaiserslautern, 13,000; Brunswick, 13,600; Dulsburg, 16,000; Bremen, 16,500; Frankfurt, Oberhausen and Hamburg, 17,000) the

ngladbach team captain Günter Netzer waving jubilantly the Federal Republic Soccer League cup

average gate did not even reach 18,000, long considered to be the absolute 34 points at home. num from the financial point of

Clubs everywhere lament the 45 games cancelled owing to bad weather, more than in the previous five seasons put together. "The winter cost us several hundred thousand Marks," nearly all treasurers maintain. In a number of towns there has been talk of handing profes-sional licences back to the Football Asso-

Mönchengladbach and Berlin were alone in being satisfied with both the financial and the sporting side of the season. The Olympic stadium in West Berlin averaged a 40,000 gate for Hertha BSC's home games and the club finished

the season with thirty out of a possible

Only the champions have a comparable record to show for themselves. Their average gate was 25,000 in a stadium that only holds 32,000. Borussia Mönchengladbach was also the most successful away team, with a record of 21 points for and thirteen against, closely followed by Bayern Munich with twenty and fourteen.

These are not the only statistical records Mönchengladbach have bagged this season. Never before have the champions romped home with so many points - 51. In 1966 1860 Munich reached fifty. Four seasons later 1860 managed only 25 and have been unable to avoid relegation. Rolf Heggen
